SUMMARY

As a computer engineer actively pursuing opportunities in frontend or full-stack development, I am dedicated to leveraging my technical expertise to craft meticulously designed websites. With a strong foundation in computer engineering, I aim to apply my skills to create immersive online experiences that seamlessly blend functionality and aesthetics.

WORK EXPERIENCE

Anik Software Technologies

Web development Instructor and Social media management

January 2023 - Present

- Provided engaging and informative lessons on HTML, CSS, JavaScript, and Bootstrap to students at various skill levels.
- Managed and curated content for social media channels to enhance visibility and engagement.
- Fostered a vibrant community by encouraging interaction and participation among students.
- Promoted educational resources effectively through strategic use of social media and other channels.

BrainyBeam Technologies

Internship in Python with Django

January 2022 - April 2022

- During my internship at BrainyBeam Technologies, I undertook a comprehensive project focused on developing a location-based vehicle service platform using Python with Django.
- This project aimed to streamline vehicle service requests by leveraging location-based services to connect users with nearby service providers efficiently.

Infolabs

Web Development Intern

May 2021 - June 2021

- The whole training was focused on HTML and PHP for creating web pages.
- In a training program I have gotten a comprehensive overview of web development principles and practical exposure to real-time API handling.

SKILLS

- Programming Languages: C, Java, Python
- Web Development: HTML, CSS, JavaScript, Typescript, ReactJS, Django, Tailwind CSS, NextJs
- Database Management: SQL
- Version control system: Git (Github)
- Social Media Management

PROJECTS

Personal Portfolio Website

May 2024- June 2024

- Designed and developed a portfolio website using NextJS and Tailwind CSS.
- Implemented a user-friendly interface with a focus on accessibility, responsiveness and modern design principles.
- Used Shadcn UI for dark mode feature to get to know how to use UI library.
- Technologies used: HTML5, CSS3, JavaScript, Git, ReactJS, NextJS, Tailwind CSS, Shadcn UI, Vercel for deployment .

Frontend Mentor Challenges Page

June-2024

- Developed a collection of solutions for Frontend Mentor challenges page using Next.js and Tailwind CSS.
- Consolidated multiple small projects into a single repository to maintain a clean and organized GitHub profile. Updating it regularly with new challenges done by me.
- Technologies used: HTML5, CSS3, JavaScript, Git, ReactJS, NextJS, Tailwind CSS, Vercel.

EDUCATION

2018 - 2022 | Silver Oak College of Engineering and Technology (GTU)

Bachelor of Engineering - Computer Engineering

Result : 7.8 CGPA

CERTIFICATION

Responsive Web Design (FreeCodeCamp)

- <https://www.freecodecamp.org/certification/sr467/responsive-web-design>
